IN THE CLAIMS:

A complete listing of the claims is set forth below. Please amend the claims as

follows:

1. (Currently Amended) An electronic marketplace for dynamic pricing in an

unbalanced market, the electronic marketplace comprising: comprising one or more

computers collectively supporting a market having two sides and in which there are

generally fewer market participants associated with the first side than with the second

side, each market participant associated with the first side generally having a greater

market capacity than each market participant associated with the second side, the first

side being sealed such that offers associated with the first side are inaccessible to the

market participants, the second side being open such that offers associated with the

second side are accessible to the market participants, the

a first side of the unbalanced market comprising a plurality of market participants

coupled with the electronic marketplace;

a second side of the unbalanced market comprising a plurality of market

participants coupled with the electronic marketplace, each market participant associated

with the first side of the unbalanced market having a larger market capacity than each

market participant associated with a second side of the unbalanced market and each

market participant associated with the second side of the unbalanced market having a

smaller-capacity than each market participant associated with the first side of the

<u>unbalanced market;</u>

one or more computers collectively supporting the unbalanced market, the one or

more computers collectively operable to:

receive offers from one or more market participants associated with the

first side of the unbalanced market and from one or more market participants associated

with the second side, side of the unbalanced market, each offer comprising at least an

offered price and an offered quantity;

prioritize among any offers associated with the first side of the unbalanced

market that comprise equal offered prices and among any offers associated with the

second side of the unbalanced market that comprise equal offered prices according to a

predetermined prioritization scheme, the prioritization among such equally priced offers

determining the order in which they are matched with other offers;

match a first offer associated with the first side of the unbalanced market

with a second offer associated with the second side of the unbalanced market according

to a relationship between a first offered price associated with the first offer and a second

offered price associated with the second offer; and

determine a strike price for the match between the first offer and the

second offer based on the relationship between the first and second offered prices.

2. **(Currently Amended)** The <u>e</u>lectronic marketplace of Claim 1, wherein:

the first side of the unbalanced market comprises a bid side, the market

participants associated with the first side of the unbalanced market comprise buyers,

and the offers associated with the first side of the unbalanced market comprise bids;

and

the second side of the <u>unbalanced</u> market comprises an ask side, the market

participants associated with the second side of the unbalanced market comprise sellers,

and the offers associated with the second side of the unbalanced market comprise

asks.

3. (Currently Amended) The electronic marketplace of Claim 1, wherein the

first side of the unbalanced market is sealed such that offered prices and offered

quantities of offers associated with the first side of the unbalanced market are

inaccessible to all one or more market participants.

4. (Currently Amended) The electronic marketplace of Claim 1, wherein the

second side of the unbalanced market is open such that offered prices of offers

associated with the second side of the unbalanced market are accessible to all one or

more market participants.

5. (Previously Presented) The electronic marketplace of Claim 1, wherein

the equally priced offers are prioritized according to the order in which they are

received, an earlier-received offer being given a higher priority than a later-received

offer having a equal offered price.

6. **(Previously Presented)** The electronic marketplace of Claim 1, wherein:

the relationship between the first and second offers comprises the first and

second offered prices being equal to each other; and

the strike price for the match between the first and second offers is equal to the

first and second offered prices.

7. (Previously Presented) The electronic marketplace of Claim 1, wherein:

the relationship between the first and second offers comprises the first offered

price being different from the second offered price; and

the strike price for the match between the first and second offers comprises a

price between the first and second offered prices.

8. **(Previously Presented)** The electronic marketplace of Claim 7, wherein

the first offered price is greater than the second offered price and the strike price for the

match between the first and second offers comprises the second offered price plus a

predetermined fraction of the price difference between the first and second offered

prices.

9. (Currently Amended) The electronic marketplace of Claim 1, wherein a

partial depletion of an offered quantity due to one or more matches is inaccessible to

the one or more market participants.

10. (Currently Amended) The electronic marketplace of Claim 1, wherein the

one or more computers are further operable to remove an offer from the second side of

the unbalanced market without giving any of the one or more market participants any

indication whether the offer was removed due to the occurrence of a match between the

offer and another offer or due to the cancellation of the offer.

11. (Currently Amended) A computer-implemented method for providing

dynamic pricing in an unbalanced market, comprising:

providing a market having two sides and in which there are generally fewer

market participants associated with the first side than with the second side, each market

participant associated with the first side generally having a greater market capacity than

each market participant associated with the second side, the first side being sealed

such that offers associated with the first side are inaccessible to the market participants,

the second side being open such that offers associated with the second side are

accessible to the market participants;

providing a first side of the unbalanced market comprising a plurality of market

participants coupled with the electronic marketplace;

providing a second side of the unbalanced market comprising a plurality of

market participants coupled with the electronic marketplace, each market participant

associated with the first side of the unbalanced market having a larger market capacity

than each market participant associated with a second side of the unbalanced market

and each market participant associated with the second side of the unbalanced market

having a smaller-capacity than each market participant associated with the first side of

the unbalanced market;

receiving offers from one or more market participants associated with the first

side of the unbalanced market and from one or more market participants associated

with the second side, side of the unbalanced market, each offer comprising at least an

offered price and an offered quantity;

prioritizing among any offers associated with the first side of the unbalanced

market that comprise equal offered prices and among any offers associated with the

second side of the unbalanced market that comprise equal offered prices according to a

predetermined prioritization scheme, the prioritization among such equally priced offers

determining the order in which they are matched with other offers;

matching a first offer associated with the first side of the unbalanced market with

a second offer associated with the second side of the unbalanced market according to a

relationship between a first offered price associated with the first offer and a second

offered price associated with the second offer; and

determining a strike price for the match between the first offer and the second

offer based on the relationship between the first and second offered prices.

12. (Currently Amended) The method of Claim 11, wherein:

the first side of the unbalanced market comprises a bid side, the market

participants associated with the first side of the unbalanced market comprise buyers,

and the offers associated with the first side of the unbalanced market comprise bids;

and

the second side of the unbalanced market comprises an ask side, the market

participants associated with the second side of the unbalanced market comprise sellers,

and the offers associated with the second side of the unbalanced market comprise

asks.

13. (Currently Amended) The method of Claim 11, wherein the first side of

the unbalanced market is sealed such that offered prices and offered quantities of offers

associated with the first side of the unbalanced market are inaccessible to all one or

more market participants.

14. (Currently Amended) The method of Claim 11, wherein the second side

of the unbalanced market is open such that offered prices of offers associated with the

second side of the unbalanced market are accessible to all one or more market

participants.

15. (Previously Presented) The method of Claim 11, wherein the equally

priced offers are prioritized according to the order in which they are received, an earlier-

received offer being given a higher priority than a later-received offer having a equal

offered price.

16. **(Previously Presented)** The method of Claim 11, wherein:

the relationship between the first and second offers comprises the first and

second offered prices being equal to each other; and

the strike price for the match between the first and second offers is equal to the

first and second offered prices.

17. **(Previously Presented)** The method of Claim 11, wherein:

the relationship between the first and second offers comprises the first offered

price being different from the second offered price; and

the strike price for the match between the first and second offers comprises a

price between the first and second offered prices.

18. (Previously Presented) The method of Claim 17, wherein the first offered

price is greater than the second offered price and the strike price for the match between

the first and second offers comprises the second offered price plus a predetermined

fraction of the price difference between the first and second offered prices.

19. (Currently Amended) The method of Claim 11, wherein a partial

depletion of an offered quantity due to one or more matches is inaccessible to the one

or more market participants.

20. (Currently Amended) The method of Claim 11, further comprising removing an offer from the second side of the <u>unbalanced</u> market without giving any of the one or more market participants any indication whether the offer was removed due to the occurrence of a match between the offer and another offer or due to the cancellation of the offer.

21. (Currently Amended) Software enabling dynamic pricing in an

unbalanced market, supporting a market having two sides and in which there are

generally fewer market participants associated with the first side than with the second

side, each market participant associated with the first side generally having a greater

market capacity than each market participant associated with the second side, the first

side being sealed such that offers associated with the first side are inaccessible to the

market participants, the second side being open such that offers associated with the

second side are accessible to the market participants, the software embodied in a

computer-readable medium and when executed operable to:

receive offers from one or more market participants associated with the first side

of the unbalanced market and from one or more market participants associated with the

second side, side of the unbalanced market, each offer comprising at least an offered

price and an offered quantity;

prioritize among any offers associated with the first side of the unbalanced

market that comprise equal offered prices and among any offers associated with the

second side of the unbalanced market that comprise equal offered prices according to a

predetermined prioritization scheme, the prioritization among such equally priced offers

determining the order in which they are matched with other offers;

match a first offer associated with the first side of the unbalanced market with a

second offer associated with the second side of the unbalanced market according to a

relationship between a first offered price associated with the first offer and a second

offered price associated with the second offer; and

determine a strike price for the match between the first offer and the second offer

based on the relationship between the first and second offered prices.

Amendment Attorney Docket No. 020431.0955 Serial No. 09/945,296 Page 10 of 30 22. (Currently Amended) The software of Claim 21, wherein:

the first side of the <u>unbalanced</u> market comprises a bid side, the market

participants associated with the first side of the unbalanced market comprise buyers,

and the offers associated with the first side of the unbalanced market comprise bids;

and

the second side of the <u>unbalanced</u> market comprises an ask side, the market

participants associated with the second side of the unbalanced market comprise sellers,

and the offers associated with the second side of the unbalanced market comprise

asks.

23. (Currently Amended) The software of Claim 21, wherein the first side of

the unbalanced market is sealed such that offered prices and offered quantities of offers

associated with the first side of the unbalanced market are inaccessible to all one or

more market participants.

24. (Currently Amended) The software of Claim 21, wherein the second side

of the unbalanced market is open such that offered prices of offers associated with the

second side of the unbalanced market are accessible to all one or more market

participants.

25. (Previously Presented) The software of Claim 21, wherein the equally

priced offers are prioritized according to the order in which they are received, an earlier-

received offer being given a higher priority than a later-received offer having a equal

offered price.

26. (Previously Presented) The software of Claim 21, wherein:

the relationship between the first and second offers comprises the first and

second offered prices being equal to each other; and

the strike price for the match between the first and second offers is equal to the

first and second offered prices.

27. **(Previously Presented)** The software of Claim 21, wherein:

the relationship between the first and second offers comprises the first offered

price being different from the second offered price; and

the strike price for the match between the first and second offers comprises a

price between the first and second offered prices.

28. (Previously Presented) The software of Claim 27, wherein the first

offered price is greater than the second offered price and the strike price for the match

between the first and second offers comprises the second offered price plus a

predetermined fraction of the price difference between the first and second offered

prices.

29. (Currently Amended) The software of Claim 21, wherein a partial

depletion of an offered quantity due to one or more matches is inaccessible to all of the

one or more market participants.

30. (Currently Amended) The software of Claim 21, wherein the software is

further operable to remove an offer from the second side of the unbalanced market

without giving any of the one or more market participants any indication whether the

offer was removed due to the occurrence of a match between the offer and another

offer or due to the cancellation of the offer.

Amendment Attorney Docket No. 020431.0955 Serial No. 09/945,296 Page 12 of 30 31. (Currently Amended) A system for providing dynamic pricing in an

unbalanced market, supporting a market having two sides and in which there are

generally fewer market participants associated with the first side than with the second

side, each market participant associated with the first side generally having a greater

market capacity than each market participant associated with the second side, the first

side being sealed such that offers associated with the first side are inaccessible to the

market participants, the second side being open such that offers associated with the

second side are accessible to the market participants, the system comprising:

means for providing a first side of the unbalanced market comprising a plurality of

market participants coupled with the electronic marketplace;

means for providing a second side of the unbalanced market comprising a

plurality of market participants coupled with the electronic marketplace, each market

participant associated with the first side of the unbalanced market having a larger

market capacity than each market participant associated with a second side of the

unbalanced market and each market participant associated with the second side of the

unbalanced market having a smaller-capacity than each market participant associated

with the first side of the unbalanced market;

means for receiving offers from one or more market participants associated with

the first side of the unbalanced market and from one or more market participants

associated with the second side, side of the unbalanced market, each offer comprising

at least an offered price and an offered quantity;

means for prioritizing among any offers associated with the first side of the

unbalanced market that comprise equal offered prices and among any offers associated

with the second side of the unbalanced market that comprise equal offered prices

according to a predetermined prioritization scheme, the prioritization among such

equally priced offers determining the order in which they are matched with other offers;

means for matching a first offer associated with the first side of the unbalanced

market with a second offer associated with the second side of the unbalanced market

according to a relationship between a first offered price associated with the first offer

and a second offered price associated with the second offer; and

means for determining a strike price for the match between the first offer and the

32. (Currently Amended) An electronic marketplace for dynamic pricing in an

unbalanced market, the electronic marketplace comprising: comprising one or more

computers collectively supporting a market having a bid side and an ask side and in

which there are generally fewer buyers associated with the bid side than there are

sellers associated with the ask side, each buyer generally having a greater buying

capacity than the selling capacity of each seller, the bid side being sealed such that bid

prices and bid quantities associated with bids are inaccessible to the buyers and sellers,

the ask side being open such that ask prices associated with asks are accessible to the

buyers and sellers,

a bid side of the unbalanced market comprising a plurality of buyers coupled with

the electronic marketplace;

an ask side of the unbalanced market comprising a plurality of sellers coupled

with the electronic marketplace, each buyer associated with the bid side of the

unbalanced market having a larger market capacity than each seller associated with a

ask side of the unbalanced market and each seller associated with the ask side of the

unbalanced market having a smaller-capacity than each buyer associated with the bid

side of the unbalanced market;

one or more computers collectively supporting the unbalanced market, the one or

more computers collectively operable to:

receive bids from one or more buyers and asks from one or more sellers,

each bid comprising at least a bid price and a bid quantity, each ask comprising at least

an ask price and an ask quantity;

prioritize among any bids that comprise equal bid prices and among any

asks that comprise equal ask prices according to the order in which they are received,

an earlier-received bid or ask being given a higher priority than a later-received bid or

ask having a equal bid or ask price, higher priority bids or asks being matched with asks

or bids before lower-priority bids or asks are matched with asks or bids;

match a bid with an ask according to a relationship between a

corresponding bid price and a corresponding ask price;

determine a strike price for the match between the bid and the ask based

on the relationship between the corresponding bid and ask prices;

if the corresponding ask quantity is fully depleted due to the ask being

matched with the bid, remove the ask from the market without any buyer or seller

receiving giving one or more buyers or one or more sellers any indication whether the

ask was removed due to the ask being matched with the bid or due to a cancellation of

the ask; and

if the corresponding ask quantity is only partially depleted due to the ask

being matched with the bid, reduce the corresponding ask quantity in accordance with

the partial depletion without giving one or more buyers or one or more sellers any buyer

or seller receiving any indication that the corresponding ask quantity was reduced.
